2024-04-29

Introduction

- ▶ Global urbanization has surpassed rural population for the first time.
- ▶ Expected urbanization rate to exceed 70% by 2050.
- ▶ Rise in urban social disorder alongside urbanization.
- ▶ This Dataset covers 186 national capitals and major urban centers from 1960 to 2014.
- ▶ This new data opens up exciting opportunities for future research in areas such as democratization and contested elections, impacts of climate change on food security, and interactions between various forms of mobilization and violence.
